## Professional Experience

---

### AX Technology Pte Ltd

Nov 2021 - July 2022

#### Web Developer

- Used Agile scrum for on-time delivery in fast-paced startup environment.
- Assist with smooth launch of application that generated first revenue stream for the company.
- Suggested design changes to UI/UX team that were implemented.
- Mentored interns to create dashboard for managing VPN access for employees and creating backend models and endpoints.

#### Frontend

- Designed and created internal dashboard for uploading VR assets to cloud servers.
- Recognized by senior engineer for rapidly picking up new technologies with minimal assistance when assigned to a new project to work on urgent bug fixes before product launch.

#### Backend

- Assisted with migration of legacy code (Laravel) to Django for reducing endpoint request times by 80% on average.
- Wrote clean single responsibility endpoints for production application for a high traffic e-commerce application.

### Great Eastern Life

Aug 2017 - Oct 2021

#### Financial Adviser

- Collaborated with clients to identify pain points and customize financial product offerings to resolve them.
- Built a trusted working relationship with clients to improve two-way communication, and create opportunities for reviews and improvements to current financial plans.
